Boston Medical Aesthetics

You won't be able to spot anyone who has been in and out of the office at Boston Medical Aesthetics, and that's exactly how founder Jennifer Canesi wants it to be.

Founded in 2010, Boston Medical Aesthetics has become known as the go-to med spa for natural, confident, and stunningly beautiful results. "We're here to be a positive force in our patients' lives," says Jennifer. "We treat them with genuine kindness and respect and help them achieve their aesthetic goals in safe, effective ways."

With a strong track record of expertise, the team at Boston Medical Aesthetics has helped more than 10,000 patients throughout the country and across the globe. Every provider is an advanced practice provider with a full-time focus on aesthetic medicine, and they provide customized treatment plans based on a patient's unique anatomy and goals.

"We avoid the over-injected look and deliver a more subtle approach," says Jennifer. "My team leads with experience and expertise, and my partner Dr. Michael Tantillo and I have a combined 38 years of practicing aesthetic medicine - full time. We focus on minimally invasive treatments that deliver significant results for the face and body, and I have multiple patent pending devices aimed at improving safety within the medical aesthetics field. This work is a blend of art and science, so I really do think of myself as an artist who never compromises on results."
